

The AtomikAir system now comes with an optional removable **Summer Hood!**

Enhance the benefits of AtomikAir system and improve employee comfort by adding the Summer Hood.

IMPROVE

COMFORT

VENTILATION

MORAL

The Atomik Air Summer Hood generates a cooling airflow by redirecting and recycling cooler floor-level air to the occupant level. This stratified airflow maximizes AtomikAir's cooling potential and delivers cool air precisely where it's most needed: among your employees. Research indicates that an **8-mph** breeze can reduce the perceived temperature by up to **12°F**.

NASA's studies have revealed significant declines in productivity when temperatures range between **26°C (80°F)** and **38°C (100°F)**.

The Summer Hood's **160'** wide coverage effectively channels cooler surface air towards your employees, leading to significant reductions in perceived temperatures and a boost in productivity.

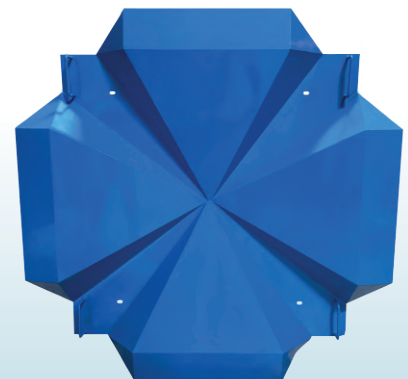

THE ATOMIKAIR SUMMER HOOD

The results and benefits of the Summer Hood :

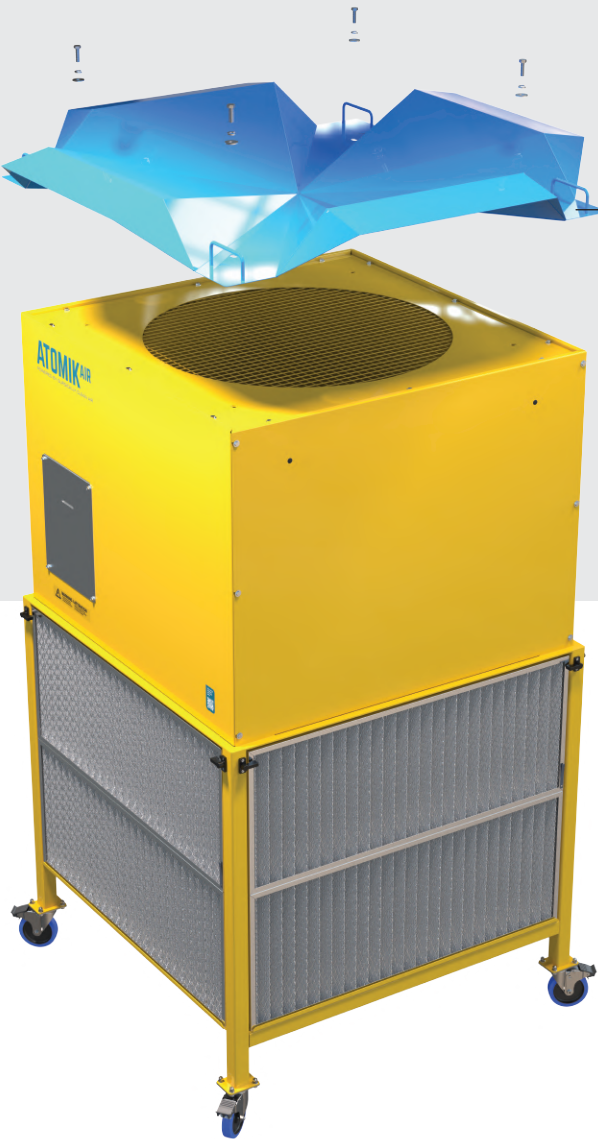

- Fresh, Clean, Breathable, Cool air directed back to where it's needed most
- Reduction in temperature and improved air circulation
- Improved employee morale and comfort
- Increased efficiency while reducing downtime and heat related frustrations
- Reduction in dust and particle build on equipment

In the warm summer months when temperatures become uncomfortable, get the most out of your AtomikAir by installing a Summer Hood!

SURGICALLY CLEAN AIR™

Throws the Air up to 80 Feet

AtomikAir Summer Hood

Easily install this air deflector and notice the change in comfort of your industrial space temperature.
